Corporate Status Match Program

Travel is even more rewarding with our award-winning loyalty program.

And now, it's easier than ever to earn.

As a benefit of being an employee of a United Airlines corporate customer, United offers the opportunity for corporate contracted employees to receive premier status match.

What does premier status match mean?

United will match the frequent-flyer status of an employee from another airline to the equivalent of United's MileagePlus frequent flyer program.

With this unique program, United can match the status of over 40 frequent flyer programs. If you have premier status with one of the participating carriers, you are eligible to apply for the equivalent premier status with United's MileagePlus program.

United offers status match to several premier levels including Premier Silver, Premier Gold, Premier Platinum and Premier 1k for select programs. For a complete description of United's status levels, visit mileageplus.com.

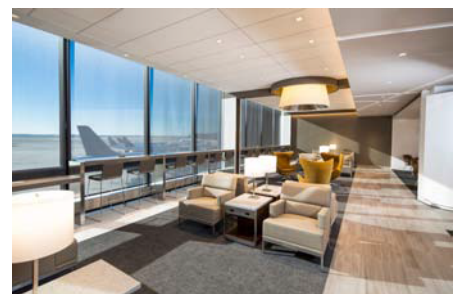

What are the benefits of the program?

MileagePlus premier members receive some of the most generous rewards out of any airline program, including bonus award miles, upgrades, Premier Access®, airport services, fee waivers and partner discounts.

After meeting the flight requirements of a 180 day trial period, matched Premier Platinum and Premier 1K customers are also eligible to receive Regional Premier Upgrades (RPU) and Global Premier Upgrades (GPU).
